Document Number: MCRA003W Revision:14 Page 3 of 4 Section IX - Accidental Release or Spillage Steps to Be Taken in Case Material is Released or Spilled Batteries that are leakage should be handled with rubber gloves. Avoid direct contact with electrolyte. Wear protective clothing and a positive pressure Self-Contained Breathing Apparatus (SCBA). Section X – Handling and Storage Safe handling and storage advice Batteries should be handled and stored carefully to avoid short circuits. Do not store in disorderly fashion, or allow metal objects to be mixed with stored batteries. Never disassemble a battery. Do not breathe cell vapors or touch internal material with bare hands. The cells and batteries shall not be stored in high temperature ,the maximum temperature allowed is 60 for a short period during the shipment, Otherwise the cells maybe leakage and can result in shortened service life. Section XI – Exposure Controls / Person Protection Occupational Exposure Limits: LTEP N.A. Respiratory Protection (Specify Type) N.A. Ventilation Local Exhausts Special N.A. N.A. Mechanical (General) Other N.A. N.A. Protective Gloves Eye Protection N.A. Other Protective Clothing or Equipment Work / Hygienic Practices N.A. Section XII - Ecological Information N.A. Section XIII - Disposal Method

Dispose of batteries according to government regulations.

Document Number: MCRA003W Revision:14 Page 4 of 4

Section XIV – Transportation Information

All GP lithium Photo batteries (Lithium Metal Battery) comply to the necessary requirements under the UN Manual of Tests and Criteria as referenced in the following transportation regulations:

- 1. UN Recommendations on the Transport of Dangerous Goods Model Regulations
- 2. U.S. Department of Transportation hazardous materials regulations (HMR),
- 3. International Civil Aviation Organization (ICAO) Technical Instructions,
- 4. International Air Transport Association (IATA) Dangerous Goods Regulations, Partially Regulated DG section II of PI 968 and
- 5. International Maritime Dangerous Goods (IMDG) Code. Special Provision 188, Special Provision 230 & Special Provision 903

GP lithium Photo Batteries are exempted from these regulations since they meet all UN Testing requirements and not exceed 1g lithium equivalent for single cell and 2g lithium equivalent for battery. (UN3090.) Non-dangerous Goods.

All GP lithium Photo battery (Lithium Metal Battery) packaging comply with Partially regulated DG. section II of PI 968.

Cells & batteries should be packaged in accordance with these transportation regulations. It is especially important to ensure that cells & batteries are packed in such a way to prevent short circuits.

** The commodity is met the UN manual of Tests and Criteria, Part III, Sub-section 38.3 **Non-dangerous goods.

Such battery have been packed in inner packaging in such a manner as to effectively prevent short circuit and movement that could lead to short circuit.

Section XV – Regulatory Information

Special requirement be according to the local regulatories.

Section XVI – Other Information

The data in this Material Safety Data Sheet relates only to the specific material designated herein.

Section XVII - Measures for fire extinction

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture.

Fire fighters should wear self-contained breathing apparatus.

WEIGHT OF LITHIUM FOR LITHIUM BATTERY

Battery type	Model	Weight of cell (g)	Aggregated lithium equivalent
			content (g)
	GPCR123A	17	0.6
	GPCR2	12	0.33
Cell	GPCR1/3N	2.3	0.06
	GPCR14250	9	0.3
	GPCR14500	17	0.66
	GPCR-P2	37	1.14
Battery	GPCR-V3	38	1.32
	GP2CR5	40	1.08
	GPCR-V9	34	0.9
